

Progress of the Project

Roofing sheets, cement & timber arrive safely

The dam built by village volunteers to run the micro-hydro turbine

Laying of HDP pipes from dam to turbine shed

The completed 4 foot micro-hydro dam

Micro hydro turbine & control panel in the shed

HDP pipes carry water from dam downstream to run the turbine generator

Pipes enter a special shed housing the turbine. Excess water is discharged to surrounding fields

Villagers clear jungle path for transmission lines to carry electricity

Completion & Handing Over to the Villagers

An emotional and joyous moment as Rotarians and their spouses applaud to celebrate the moment electricity was switched on and the village lit up with Christmas lights.

Rotarians, their spouses, the Guest of Honour, residents of the village all pose for a celebratory picture. Ladies of the village dressed in their traditional best to celebrate the momentous event.
