Since the Cold War era until today, the world has been under the influence of western civilization, accentuated by materialism and devotion to advanced technology. Many natural areas have been degraded, and men have drifted away from their old values in such a way that morality and spiritual contentment have become irrelevant to many people. Their attempts to control nature have transformed many people into egotistical individuals who are out to destroy one another through incessant wars and economic plundering. Most are after only happiness in this life, and believing that there is no life after this. The Sanctuary of Truth was conceived out of the vision that human civilization has been achieved and nurtured by religious and philosophical truth. This sanctuary was created not from hubris but from goodness drawn from religion, philosophy and art.
